Declaration of principles on quality, the environment and occupational health and safety

June 2023

Declaration of principles on quality, the environment and occupational health and safety

BERGÉ is a logistics operator that is present all over the globe. It integrates the entire value chain in order to transport and manage the logistics of all types of goods and products, with an extensive infrastructure specialising in port operations, integral vehicle logistics, value-added logistics and externalising shipping and procedures.

Within the framework of its activity, BERGÉ is firmly committed to quality, the environment, health and safety in the workplace, food safety and sustainability, as can be seen through its implementation of a management system which aims to:

- + Promote a process-based approach, gain a greater understanding of the goals and context in which the organisation operates and apply risk-based thinking in an effort to minimise negative effects, maximise opportunities, achieve the expected results and adapt to change.
- + Promote and engage in internal and external communication and encourage reciprocal cooperation with its stakeholders.
- + Achieve customer satisfaction by providing services that meet all their needs and expectations.
- + Incorporate the most demanding standards in order to satisfy a highly competitive market, guarantee the compliance of its services and promote an approach that increases customer satisfaction and meets the needs and expectations of our stakeholders.
- + Demonstrate its commitment to the environment by preventing pollution, using natural resources in a sustainable manner and fostering energy efficiency and a low-carbon economy.
- + Provide safe and healthy work conditions to help prevent injuries and deterioration in health associated with work and road safety, with a special focus on mitigating dangers and reducing risks to health and safety in the workplace and health risks to goods.
- + Ensure compliance with the requirements of the safety management system for animal feed and sustainable goods by offering training to all staff involved in the management, operation and safety of products and goods.
- + Guarantee that the company fulfils all applicable requirements, including legal and regulatory requirements and any others to which the company may subscribe.

- + Periodically evaluate the results in order to ensure the continuous improvement of its processes, activities, services and management systems.

The Declaration of Principles applies to all BERGÉ professionals and activities and will be made available via the corporate intranet and the company's website so that it may be shared with third parties.

This Declaration will be used for communication, training and awareness-raising actions in order to enhance its understanding and application, and it may be reviewed and/or modified to adapt it to the needs and context of the company.
